

SCALESIGHT × NATURANA

SIZE-TO-BUY PLANNING WORKSPACE

NATURANA × UNDERSTATEMENT CAPSULE

Product & Technical Specification

Developer Implementation Guide for Wahib

Version 1.0 · Prepared September 2026

FROM SIZE SIGNAL TO NEXT-BUY DECISION

Internal Product Specification / Prospect-Specific Concept

Analysis maintained by ScaleSight. Decisions made with NATURANA.

Executive summary

Build a prospect-specific Size-to-Buy Planning Workspace for the NATURANA × Understatement capsule: eight products and all 85 public variants across band/cup, EU numeric and alpha sizing. The experience follows translated size demand through early launch sales, fit-related movement, inventory exposure, next-buy allocation and specialist review.

Public catalog records are supplied facts; operating values are synthetic demonstration assumptions. The workspace is the interface to a managed planning intelligence service. ScaleSight maintains analysis and prepares recommendations; NATURANA makes purchasing and commercial decisions.

Wahib must implement the ten supplied routes, exact page copy, complete dataset and canonical scenarios. Stephanie should understand the downstream inventory problem within two minutes and why ScaleSight remains involved after implementation.

01. Purpose and commercial objective

Application name

ScaleSight × NATURANA

Workspace name

Size-to-Buy Planning

Context label

NATURANA × Understatement Capsule

Primary proposition

Translating mixed sizing demand into better next-buy decisions.

The demo begins with the exact problem Stephanie described publicly, but it deliberately moves one step beyond customer fit.

The commercial question is:

Once customers begin buying through two different sizing systems, what does that demand mean for the next inventory commitment?

The application must show how ScaleSight turns:

size structure → launch demand → fit signal → inventory exposure → next-buy recommendation → human planning review

into management decisions.

This is **not** a size-conversion tool.

It is **not** a dashboard.

It is **not** software NATURANA would be expected to operate.

It is a prospect-specific example of a planning layer that ScaleSight could maintain around NATURANA's real business.

02. Source-of-truth and data classification

[PUBLIC FACT] Phase 1 governs catalog names, prices, SKUs, barcodes, sizes and matching relationships.

[SYNTHETIC DEMO INPUT] Phase 2 governs inventory, sales, exchanges, costs, forecasts, scenarios and recommendations.

[DERIVED DEMO METRIC] Retained demand, weeks cover, reorder gaps, projected inventory and indices are calculated centrally.

[ANALYST INTERPRETATION] ScaleSight reviews signals and commercial context; final decisions remain with NATURANA.

Preserve source values. Current storefront availability is not inventory evidence. Synthetic translation is not official customer-facing fit guidance.

Illustrative Planning Concept Product, size and catalog information is based on publicly available information. Sales, inventory, returns, exchanges, costs, forecasts and recommendations are synthetic assumptions created solely to demonstrate the ScaleSight planning workflow.

The short badge should say:

Illustrative Data

Tooltip contains the full disclaimer.

03. Verified capsule structure

ID	Understatement public name	NATURANA public name	Colour	Size system	Understatement price	NATURANA price	Variants
DL-BRA	Micro Mesh Padded Bra	Wireless Triangle Bra - Dark Leo	Dark Leopard / Dark Leo	Band + cup	€65	€64.95	24
DL-BTM	Micro Mesh Midi Hipster	Briefs - Dark Leo	Dark Leopard / Dark Leo	EU numeric	€35	€34.95	7
PL-BRA	Micro Mesh Underwired Bra	Underwired Plunge Bra - Plum	Plum	Band + cup	€65	€59.90	19
PL-BTM	Micro Mesh Midi Hipster	Briefs - Plum	Plum	EU numeric	€35	€34.95	7
CP-BRA	Opaque Triangle Scoop Bralette	Wireless Triangle Bra - Candy Pink	Candy Pink	Alpha	€69	€69	7
CP-BTM	Opaque Mesh Midi Briefs	Midi-Briefs - Candy Pink	Candy Pink	Alpha	€35	€35	7
CH-BRA	Opaque Mesh Balconette	Wire-free Balconette Bra - Cherry	Cherry	Alpha	€79	€79	7
CH-BTM	Opaque Mesh Midi Briefs	Midi-Briefs - Cherry	Cherry	Alpha	€35	€35	7

Total public variants: 85.

A useful cleanup for the demo: the Dark Leo Naturana page has one inconsistent bullet calling it “underwired,” while its own description says it is without underwires, and Understatement calls it a padded wireless bra. I would therefore treat **“padded wireless triangle bra”** as the correct demo description rather than repeating that apparent copy inconsistency.

04. Complete public variant catalog

Canonical identifier rule

For the technical document, use the **Understatement public SKU + public barcode as the canonical public variant identifiers**. Understatement exposes these systematically for every collaboration variant in its storefront data. NATURANA exposes composite SKU strings such as 15285_630_S_4_7333468033895, but the crawled page generally exposes that for the currently selected variant rather than giving us a clean exhaustive NATURANA SKU table. We should **not infer missing NATURANA internal SKUs**.

The application can therefore have:

```
publicSku = Understatement SKU
barcode = verified shared product barcode
naturanaSku = only populate where directly observed; otherwise null
demoVariantId = our own internal safe identifier
```

Complete public variant dataset

1. Micro Mesh Padded Bra - Dark Leopard / Dark Leo

Public sizes are the complete 6-band × 4-cup matrix: **70-95 × A-D = 24 variants**. Understatement exposes every SKU and barcode.

Size	Public SKU	Barcode
70A	U-329-001-70A	4055403909388
70B	U-329-001-70B	4055403909326
70C	U-329-001-70C	4055403909500
70D	U-329-001-70D	4055403909449
75A	U-329-001-75A	4055403909371
75B	U-329-001-75B	4055403909319

Size	Public SKU	Barcode
75C	U-329-001-75C	4055403909494
75D	U-329-001-75D	4055403909432
80A	U-329-001-80A	4055403909364
80B	U-329-001-80B	4055403909302
80C	U-329-001-80C	4055403909487
80D	U-329-001-80D	4055403909425
85A	U-329-001-85A	4055403909357
85B	U-329-001-85B	4055403909296
85C	U-329-001-85C	4055403909470
85D	U-329-001-85D	4055403909418
90A	U-329-001-90A	4055403909340
90B	U-329-001-90B	4055403909289
90C	U-329-001-90C	4055403909463
90D	U-329-001-90D	4055403909401
95A	U-329-001-95A	4055403909333
95B	U-329-001-95B	4055403909272
95C	U-329-001-95C	4055403909456
95D	U-329-001-95D	4055403909395

NATURANA's selected 70A record is publicly exposed as 5687_842_70A_4_4055403909388, confirming the same barcode for that variant.

2. Micro Mesh Midi Hipster - Dark Leopard / Dark Leo

Sizes: **36, 38, 40, 42, 44, 46, 48.**

Size	Public SKU	Barcode
36	U-330-002-36	4055403909197
38	U-330-002-38	4055403909180
40	U-330-002-40	4055403909173
42	U-330-002-42	4055403909166
44	U-330-002-44	4055403909159
46	U-330-002-46	4055403909142
48	U-330-002-48	4055403909135

One storefront nuance: the Understatement page has shown “Coming Soon” merchandising language while the embedded variant data reports the variants as available. **Do not use current storefront availability as a factual inventory signal in our demo.** It is volatile and not the planning point.

3. Micro Mesh Underwired Bra - Plum

The actual public range is **19 variants**, not a full 4 × 5 matrix. Sizes 75/80/85 carry A-E, but **90E is not offered**; the 90 band stops at D. This matters because the demo must not manufacture impossible variants.

Size	Public SKU	Barcode
75A	U-296-001-75A	4055403909012
75B	U-296-001-75B	4055403908978
75C	U-296-001-75C	4055403909128

Size	Public SKU	Barcode
75D	U-296-001-75D	4055403909081
75E	U-296-001-75E	4055403909043
80A	U-296-001-80A	4055403909005
80B	U-296-001-80B	4055403908961
80C	U-296-001-80C	4055403909111
80D	U-296-001-80D	4055403909074
80E	U-296-001-80E	4055403909036
85A	U-296-001-85A	4055403908992
85B	U-296-001-85B	4055403908954
85C	U-296-001-85C	4055403909104
85D	U-296-001-85D	4055403909067
85E	U-296-001-85E	4055403909029
90A	U-296-001-90A	4055403908985
90B	U-296-001-90B	4055403908947
90C	U-296-001-90C	4055403909098
90D	U-296-001-90D	4055403909050

NATURANA displays the same style at €59.90 while Understatement currently lists it at €65. For the prospect-specific workspace I recommend using **NATURANA storefront pricing**, because Stephanie is the NATURANA buyer, while retaining the Understatement public SKU/barcode as our clean canonical ID.

4. Micro Mesh Midi Hipster - Plum

Sizes: **36-48 in steps of two.**

Size	Public SKU	Barcode
36	U-330-001-36	4055403909265
38	U-330-001-38	4055403909258
40	U-330-001-40	4055403909241
42	U-330-001-42	4055403909234
44	U-330-001-44	4055403909227
46	U-330-001-46	4055403909210
48	U-330-001-48	4055403909203

The NATURANA 36 variant publicly exposes 4687_656_36_3_4055403909265, again matching the public barcode.

5. Opaque Triangle Scoop Bralette - Candy Pink

Sizes: **XS, S, M, L, XL, XXL, 3XL.**

Size	Public SKU	Barcode
XS	U-285-004-XS	7333468033888
S	U-285-004-S	7333468033895
M	U-285-004-M	7333468033901
L	U-285-004-L	7333468033918
XL	U-285-004-XL	7333468033925

Size	Public SKU	Barcode
XXL	U-285-004-XXL	7333468033932
3XL	U-285-004-3XL	7333468033949

NATURANA exposes the S variant as 15285_630_S_4_7333468033895, which matches the same barcode.

6. Opaque Mesh Midi Briefs - Candy Pink

Sizes: **XS-3XL**.

Size	Public SKU	Barcode
XS	U-260-003-XS	7333468034021
S	U-260-003-S	7333468034038
M	U-260-003-M	7333468034045
L	U-260-003-L	7333468034052
XL	U-260-003-XL	7333468034069
XXL	U-260-003-XXL	7333468034076
3XL	U-260-003-3XL	7333468034083

7. Opaque Mesh Balconette - Cherry

Sizes: **XS-3XL**. Naturana also explicitly advises customers who are between sizes to consider the larger size, which is useful context for our later fit-signal scenario-but it should remain customer-facing context, not be treated as internal demand evidence.

Size	Public SKU	Barcode
XS	U-257-002-XS	7333468033604

Size	Public SKU	Barcode
S	U-257-002-S	7333468033611
M	U-257-002-M	7333468033628
L	U-257-002-L	7333468033635
XL	U-257-002-XL	7333468033642
XXL	U-257-002-XXL	7333468033659
3XL	U-257-002-3XL	7333468033666

8. Opaque Mesh Midi Briefs - Cherry

Sizes: **XS-3XL**.

Size	Public SKU	Barcode
XS	U-260-002-XS	7333468034090
S	U-260-002-S	7333468034106
M	U-260-002-M	7333468034113
L	U-260-002-L	7333468034120
XL	U-260-002-XL	7333468034137
XXL	U-260-002-XXL	7333468034144
3XL	U-260-002-3XL	7333468034151

NATURANA's Cherry XS record is publicly shown as 14260_658_XS_3_7333468034090.

05. Size-system architecture

The real sizing architecture we can safely build around

There are **three genuine commercial size structures inside one eight-product capsule**:

Band + cup: 70A-95D / 75A-90D/E depending on style.

EU numeric bottoms: 36-48.

Alpha: XS-3XL for both the Candy Pink and Cherry sets.

This is exactly why the demo can feel sophisticated without inventing complexity.

NATURANA publicly tells customers to derive bra sizing from **underbust + bust measurements**, uses waist measurements for bottoms, and specifically explains sister-size equivalence-for example, 85B and 80C have the same cup volume.

Understatement likewise builds its guide around **below bust, chest, waist and hip measurements**. Its public bralette guidance also demonstrates that the relationship is not one-to-one: it says a **75C could wear either L or M+**, with M+ providing extra cup depth/support.

That gives us a defensible conceptual model:

Historical NATURANA size

→ **common measurement / fit cohort**

→ **new commercial size**

→ **observed sell-through + exchanges**

→ **updated size curve**

→ **next-buy decision**

But the actual probability mapping will be explicitly **synthetic demo logic**, not presented as official NATURANA or Understatement fit guidance.

Matching-set structure

The demo should treat the assortment as four real sets:

Set	Top	Bottom
Dark Leo	Micro Mesh Padded Bra	Micro Mesh Midi Hipster
Plum	Micro Mesh Underwired Bra	Micro Mesh Midi Hipster
Candy Pink	Opaque Triangle Scoop Bralette	Opaque Mesh Midi Briefs
Cherry	Opaque Mesh Balconette	Opaque Mesh Midi Briefs

The official collection itself pairs these styles, and NATURANA's product descriptions explicitly reference matching pieces.

This means the later demo can legitimately introduce a **synthetic Set Availability Risk** such as: “bra M has enough cover, but matching brief M becomes constrained first.” The pairing is public fact; the inventory risk will be clearly synthetic.

Never call this an official fit chart.

UI label:

Synthetic planning translation

Bra cohorts

Historical fit cohort	Initial alpha allocation
70A-70B	60% XS / 40% S
70C-70D	55% S / 45% M
75A-75B	60% S / 40% M
75C-75D	55% M / 45% L
80A-80B	50% M / 50% L
80C-80D	60% L / 40% XL
85A-85B	35% L / 65% XL
85C-85D	60% XL / 40% XXL
90A-90B	40% XL / 60% XXL
90C-90D	65% XXL / 35% 3XL
95A-95B	45% XXL / 55% 3XL
95C-95D	30% XXL / 70% 3XL

These are **synthetic planning weights**, not customer fit recommendations.

Bottom translation

EU size	Synthetic alpha translation
36	70% XS / 30% S
38	70% S / 30% M
40	70% M / 30% L
42	70% L / 30% XL
44	70% XL / 30% XXL
46	70% XXL / 30% 3XL
48	100% 3XL

06. Canonical demo timeline

These dates must remain consistent throughout the application.

Field	Canonical value
Capsule launch	18 September 2026
Planning week	Week commencing 28 September 2026
Actuals through	29 September 2026
Data refresh	30 September 2026 · 06:00 CEST
Early-launch observation window	18-29 September
Default planning horizon	8 weeks
Alternative horizons	4 / 8 / 13 weeks
Next planning review	Monday · 5 October 2026
Currency	EUR
Open-to-buy scenario	€50,000
Demo classification	Illustrative Planning Concept

07. Embedded planning story

The fictional operating story is intentionally simple enough to understand quickly but sophisticated enough to show what ScaleSight adds.

What happened

The collaboration introduced **85 public product variants** across eight products using three commercial sizing structures:

band + cup, EU numeric and alpha sizing.

Before launch, the synthetic ScaleSight planning model creates an initial size curve by translating historical NATURANA-style demand through a common body/fit layer.

Once early launch demand arrives, the pattern begins to diverge.

Three meaningful things happen:

M demand is stronger than originally translated.

Some L gross sell-through is being inflated by fit-related exchanges.

Matching bottoms become constrained sooner than their corresponding tops in selected M sizes.

That creates the first real ScaleSight decision cycle.

The question is no longer:

Which size does the customer choose?

It becomes:

Which style × size combinations deserve more inventory commitment, and which apparent signals should we avoid overreacting to?

08. Canonical executive baseline

These numbers are authoritative.

Do not allow Wahib to substitute random alternatives.

Executive metric	Canonical value
Public variants monitored	85
Material planning actions	18
BUY DEEPER	6 variants
REPLENISH	11 variants
INVESTIGATE	1 variant
WATCH	9 variants
REDUCE NEXT BUY	9 variants
HOLD	49 variants
Matching-set risks	2
Open-to-buy under review	€50,000
Recommended immediate allocation	€47,500
Recommended uncommitted reserve	€2,500
Current size-curve confidence	Moderate
Material changes since prior review	7
Executive priorities	4

Definition:

Material planning actions = BUY DEEPER + REPLENISH + INVESTIGATE = 18

WATCH and REDUCE NEXT BUY appear in operational planning but are not counted in the 18 immediate intervention items.

09. Product-level planning assumptions

The public product structures come from Phase 1. Everything below is synthetic.

Product	Demo cost	Lead time	Safety stock	Target cover
Dark Leo Micro Mesh Padded Bra	€25	8 wks	2.0 wks	8 wks
Dark Leo Micro Mesh Midi Hipster	€10	6 wks	1.5 wks	6 wks
Plum Micro Mesh Underwired Bra	€25	8 wks	2.0 wks	8 wks
Plum Micro Mesh Midi Hipster	€10	6 wks	1.5 wks	6 wks
Candy Pink Triangle Scoop Bralette	€23	7 wks	2.0 wks	8 wks
Candy Pink Opaque Mesh Midi Briefs	€10	5 wks	1.5 wks	6 wks
Cherry Opaque Mesh Balconette	€25	7 wks	2.0 wks	8 wks
Cherry Opaque Mesh Midi Briefs	€10	5 wks	1.5 wks	6 wks

$\text{weeksOfCover} = \text{currentOnHand} / \text{forwardWeeklyDemand}$

Displayed WOC excludes future incoming inventory so management can see current exposure.

The inventory projection engine separately incorporates dated incoming units.

10. Complete synthetic operating dataset

Join every row below to its public SKU/barcode from **Phase 1 using product + size**.

Columns:

OH = on hand

INC = confirmed incoming

Sales = illustrative 18-29 Sep gross units

Ret = outright returns

ExOut = exchanges out of this size

ExIn = exchanges into this size

Fcst/wk = current forward weekly demand

WOC = $OH \div Fcst/wk$

Dark Leo - Micro Mesh Padded Bra

Size	OH	INC	Sales	Ret	ExOut	ExIn	Fcst/wk	WOC	Action

That is the complete operational layer for all **85 variants**.

11. Demand and fit calculation model

These formulas should drive the application centrally.

Net retained demand

```
netRetainedDemand =  
grossSales  
- outrightReturns  
- exchangeOut  
+ exchangeIn
```

For Cherry L:

$34 - 4 - 6 + 1 = 25$ units

For Cherry M:

$30 - 2 - 1 + 4 = 31$ units

This produces the central insight:

Gross demand suggests L is stronger.

Retained demand shows M is stronger.

That is the story.

Exchange-out rate

```
exchangeOutRate =  
exchangeOut / grossSales
```

Cherry L:

$6 / 34 = 17.6\%$

Display:

18% exchange-out rate

Four of those six exchanges move into M.

Display:

67% of L exchange-outs move to M

Do not say 61%.

Use **67%**, because this canonical dataset contains four of six.

Fit-adjusted demand

For V1:

`fitAdjustedDemand = netRetainedDemand`

Do not make the public demo unnecessarily complex.

Later production versions could include returns propensity, exchange lag and censored demand.

12. Common alpha-size curve

Use this everywhere.

Initial translated planning curve

Size	Initial mix
XS	9%
S	18%
M	24%
L	25%
XL	13%
XXL	7%
3XL	4%
Total	100%

Illustrative gross launch mix

Size	Gross launch mix
XS	7%
S	17%
M	31%
L	26%
XL	10%
XXL	6%
3XL	3%

Fit-adjusted commercial mix

Size	Fit-adjusted mix
XS	7.5%
S	17.5%
M	33.0%
L	22.0%
XL	10.5%
XXL	6.0%
3XL	3.5%
Total	100%

The insight:

M has gained **9 percentage points** versus the initial planning curve.

L gross demand looks approximately aligned with expectation, but after exchanges/returns:

L falls **3 percentage points below** the initial planning curve.

13. Forecast-learning model

This page needs more than one example.

Historical cohort	Initial	Early illustrative behaviour	Planning change
75C-75D	55% M / 45% L	66% M / 34% L	Increase M weighting
80A-80B	50% M / 50% L	58% M / 42% L	Moderate M uplift
80C-80D	60% L / 40% XL	51% L / 49% XL	Raise XL assumption
85A-85B	35% L / 65% XL	37% L / 63% XL	No material change
85C-85D	60% XL / 40% XXL	57% XL / 43% XXL	No material change
90C-90D	65% XXL / 35% 3XL	62% XXL / 38% 3XL	Keep under review

Analyst statement:

Early behaviour suggests that some demand originally expected to sit in L is being retained in M. The change is meaningful enough to alter the next-buy assumption, but the launch window remains short, so confidence remains Moderate rather than High.

14. Matching-set planning

Relationships:

Dark Leo bra ↔ Dark Leo hipster

Plum bra ↔ Plum hipster

Candy Pink bralette ↔ Candy Pink brief

Cherry balconette ↔ Cherry brief

Synthetic set attach-rate assumption:

62%

Do not imply it is real.

Formula

$$\text{setCoverage} = \min(\text{topCoverage}, \text{bottomCoverage} / \text{attachRateAdjustment})$$

For the UI we can simplify the explanation:

Set availability is limited by whichever matching component is expected to constrain first.

Two material risks:

Candy Pink M

Top WOC: **2.0**

Bottom WOC: **1.8**

Status:

SET RISK

Cherry M

Top WOC: **2.2**

Bottom WOC: **1.7**

Status:

SET RISK

Analyst copy:

M is commercially strong across both alpha-sized sets, but the matching briefs are tighter than the tops. Replenishing the top alone would not fully protect set availability.

15. Open-to-buy model

Canonical scenario:

Available OTB: €50,000

Recommended committed:

€47,500

Reserve:

€2,500

Product	Recommended allocation
Candy Pink bralette	€11,500
Candy Pink briefs	€5,000
Cherry balconette	€9,500
Cherry briefs	€4,500
Plum underwired bra	€7,500
Plum hipster	€3,000
Dark Leo padded bra	€5,000
Dark Leo hipster	€1,500
Uncommitted reserve	€2,500
Total	€50,000

Using synthetic unit costs, those correspond conceptually to:

Product	Cost	Planning quantity
Candy Pink bralette	€23	500
Candy Pink briefs	€10	500
Cherry balconette	€25	380
Cherry briefs	€10	450
Plum bra	€25	300
Plum hipster	€10	300
Dark Leo bra	€25	200
Dark Leo hipster	€10	150

The allocation is a **planning budget**, not a literal PO recommendation.

The UI must say:

Recommended planning allocation under current assumptions.

Never:

Optimal allocation.

18

Need a planning action

2

Matching-set risks

€50K

Open-to-buy under review

Moderate

Size-curve confidence

Priority 1

Candy Pink · M

Badge:

BUY DEEPER

What changed:

Fit-adjusted M demand is running materially above the initial translated size curve.

Why it matters:

Current cover is 2.0 weeks. The matching brief is tighter at 1.8 weeks, so the risk is across the set rather than the bralette alone.

Recommendation:

Increase M depth across the next Candy Pink commitment and protect matching brief availability.

Decision required:

Approve additional M depth before the next buy is finalised.

CTA:

Review Candy Pink M

Priority 2

Cherry · L

Badge:

INVESTIGATE

What changed:

L has the strongest gross sales in the Cherry balconette, but 18% of those sales are exchanging out of the size.

Why it matters:

Four of six exchange-outs are moving to M. Gross sell-through is therefore overstating retained L demand.

Recommendation:

Hold additional L commitment until the next review and shift attention to the stronger retained M signal.

Decision required:

Do not deepen L based on gross sell-through alone.

CTA:

Review Fit Signal

Priority 3

Plum · 80C

Badge:

BUY DEEPER

What changed:

80C is running ahead of the initial launch plan with only 2.2 weeks of current cover.

Why it matters:

The confirmed incoming quantity improves short-term availability but does not create enough depth for the current forward demand signal.

Recommendation:

Add 80C depth to the next Plum buy and continue monitoring adjacent 75C and 85C demand.

Decision required:

Increase 80C purchasing allocation.

CTA:

Open SKU Plan

Priority 4

Cherry Set · M

Badge:

SET RISK

What changed:

The Cherry M balconette has 2.2 weeks of cover while the matching brief has only 1.7.

Why it matters:

Replenishing the top without protecting the matching bottom could constrain full-set availability.

Recommendation:

Prioritise the brief alongside the top rather than planning each SKU independently.

Decision required:

Protect the M set in the next allocation.

CTA:

Review Set Availability

What changed since last review

Use seven items:

1. Candy Pink M fit-adjusted demand moved above translated plan.
2. Cherry M is now the strongest retained alpha-size signal.
3. Cherry L exchange pressure increased.
4. Candy Pink M brief cover fell below 2 weeks.
5. Plum 80C moved into BUY DEEPER.
6. Dark Leo 95D remains materially above target cover.
7. Two matching sets now require coordinated planning.

Eyebrow:

SIZE DEMAND

H1:

The commercial size curve is already moving.

Subheading:

Compare the translated planning assumption with gross launch demand and the demand customers actually retain after returns and size exchanges.

Primary chart:

Expected vs observed alpha-size mix

X axis:

XS / S / M / L / XL / XXL / 3XL

Series:

Initial translated mix

Gross launch mix

Fit-adjusted mix

Highlight:

M 24% → 33%

L 25% → 22% fit-adjusted

Insight card:

M is +9 pts above the initial planning curve.

Secondary insight:

L looks close to plan if gross sales are used. Once exchanges are incorporated, the retained demand signal is weaker.

Confidence:

Moderate

Tooltip:

Confidence remains Moderate because the launch observation window is short and several size relationships are still being learned.

CTA:

Inspect the fit signal

ScaleSight Analysis

Recommended Decision

Assumptions

Example for Cherry L:

ScaleSight Analysis Cherry L has the strongest gross launch sales in the style, but six customers have exchanged out of the size and four moved into M. The retained demand signal is therefore materially weaker than gross sell-through suggests.

Recommended decision:

INVESTIGATE Hold additional L commitment for one review cycle. Do not reduce existing availability, but do not use gross sales alone to justify a deeper next buy.

Decision required:

Review again after another week of retained-demand data.

21. Page specification - Demand vs Fit Signal

Route:

/fit-signal

Eyebrow:

Route:

/forecast-learning

Eyebrow:

PLAN VS EARLY SIGNAL

H1:

The first plan is an assumption. The next plan should learn.

Subheading:

Compare the translated size curve with early retained demand and update the next planning cycle without pretending the original mapping was perfect.

Use Section 10 table.

Highlight:

75C-75D

Initial:

55% M / 45% L

Early:

66% M / 34% L

Planning change:

Increase M weighting

Show:

Before → After arrows.

Analysis:

The original translation provided a reasonable planning baseline. Early customer behaviour is now giving NATURANA a stronger commercial signal about where the size curve should move. ScaleSight would continue updating this view as additional sell-through, exchange and inventory data arrives.

Confidence:

Moderate

Why not High?

Short launch window, limited observations in tail sizes and continuing exchange behaviour.

Built around how NATURANA actually plans

Copy:

This concept has been configured around one specific issue in the NATURANA × Understatement collaboration: translating mixed sizing demand into the next inventory decision. A live ScaleSight workspace would not be limited to this structure. It would be configured around NATURANA's actual product hierarchy, sales channels, purchase orders, supplier lead times, inventory locations, returns, seasonal collections, buying calendars and management decisions. Measures, modules and planning rules can be added, removed or reshaped around the way your team already works.

Commercial demand index

retainedDemand /
initialExpectedRetainedDemand
* 100

Set constraint

setRisk =
matchingTopCoverage < threshold
OR
matchingBottomCoverage < threshold

Planning confidence

LOW

fewer observations, high mapping uncertainty or strong stockout distortion.

MODERATE

enough data to adjust the plan but launch history remains limited.

HIGH

stable pattern across multiple planning cycles and limited fit distortion.

In this demo the overall alpha-size curve remains:

MODERATE

30. Component architecture

Component	Purpose
AppShell	Persistent client context + navigation
IllustrativeConceptBadge	Protects prospect-specific demo integrity
ExecutiveMetricCard	Decision metric
PlanningPriorityCard	Change → meaning → recommendation → decision
SizeSystemComparison	Traditional vs alpha structure
TranslationMatrix	Synthetic size planning weights
SizeCurveChart	Initial vs gross vs fit-adjusted
VariantPlanningTable	All 85 variants
VariantDecisionDrawer	Single-variant decision view
FitSignalDecomposition	Gross → returns → exchanges → retained
SetAvailabilityCard	Matching product constraint
OTBAllocationTable	Product-level planning allocation
ScenarioControls	Planning assumptions
ScenarioComparison	Base vs scenario
ForecastLearningTable	Initial vs early behaviour
AnalystRecommendationPanel	Human review
ManagedPlanningWorkflow	Explains managed service

Component	Purpose
PlanningSpecialistCard	Human analytical layer
AssumptionTable	Methodology transparency
CustomizationPanel	Shows flexibility

31. TypeScript data contract

```
type DecisionAction =  
  | "BUY_DEEPER"  
  | "REPLENISH"  
  | "HOLD"  
  | "WATCH"  
  | "INVESTIGATE"  
  | "REDUCE_NEXT_BUY";  
  
type Confidence = "LOW" | "MODERATE" | "HIGH";  
  
type SizeSystem =  
  | "BAND_CUP"  
  | "EU_NUMERIC"  
  | "ALPHA";  
  
interface Variant {  
  demoVariantId: string;  
  productId: string;  
  
  understatementProductName: string;  
  naturanaProductName: string;  
  
  colour: string;  
  productType: string;  
  matchingSetId: string;  
  
  sizeSystem: SizeSystem;  
  size: string;  
  
  band?: number;  
  cup?: string;  
  numericSize?: number;  
  alphaSize?: string;  
  
  publicSku: string;  
  barcode: string;  
  naturanaPublicSku?: string | null;  
  
  publicPriceEUR: number;  
  syntheticUnitCostEUR: number;
```

```

onHand: number;
incoming: number;
incomingDate?: string;

leadTimeWeeks: number;
safetyStockWeeks: number;
targetCoverWeeks: number;

grossLaunchSales: number;
returns: number;
exchangeOut: number;
exchangeIn: number;

forecastWeeklyUnits: number;

initialPlanningShare?: number;
translatedPlanningShare?: number;

confidence: Confidence;

modelRecommendation: DecisionAction;
analystRecommendation: DecisionAction;
analystReason?: string;

matchingVariantId?: string;
}

```

Derived fields should **not** be hardcoded:

```

netRetainedDemand
weeksOfCover
reorderGap
projectedInventory
commercialDemandIndex
setRisk

```

Calculate them centrally.

32. Scenario state contract

```
interface ScenarioState {  
  mode: "BASE" | "UPSIDE" | "DOWNSIDE";  
  
  overallDemandUpliftPct: number;  
  mDemandAdjustmentPct: number;  
  lDemandAdjustmentPct: number;  
  
  returnRateAdjustmentPP: number;  
  exchangeRateAdjustmentPP: number;  
  
  leadTimeAdjustmentWeeks: number;  
  
  openToBuyBudgetEUR: number;  
  
  setAttachRatePct: number;  
  
  promotionExtensionEnabled: boolean;  
  
  fitAdjustedDemandEnabled: boolean;  
  exchangeAdjustmentEnabled: boolean;  
}
```

Base:

```
overallDemandUpliftPct = 0  
mDemandAdjustmentPct = 0  
lDemandAdjustmentPct = 0  
returnRateAdjustmentPP = 0  
exchangeRateAdjustmentPP = 0  
leadTimeAdjustmentWeeks = 0  
openToBuyBudgetEUR = 50000  
setAttachRatePct = 62  
promotionExtensionEnabled = false  
fitAdjustedDemandEnabled = true  
exchangeAdjustmentEnabled = true
```

IMPLEMENTATION RULE: Reset to Base Plan restores all supplied base inputs atomically.

33. Managed-service UX cues

Across the application, include small contextual cues.

Examples:

Reviewed by ScaleSight

Updated in this planning cycle

ScaleSight recommendation

Planning assumption

Needs management decision

Monitoring next cycle

Do not sprinkle them everywhere.

They should appear where interpretation happens.

This is the key distinction:

system output

versus

ScaleSight-reviewed decision

34. Visual design and behaviour

Do not make all 85 variants visible at once on first load.

The UI should communicate complexity **without creating clutter**.

Default SKU page:

Show first 20 sorted by urgency.

Then pagination / virtualized table.

Badge colours:

BUY DEEPER - blue

REPLENISH - teal

INVESTIGATE - amber

WATCH - muted amber

REDUCE - red/rose

HOLD - neutral gray

Never rely on color alone.

Use icon + text.

Charts should be calm.

No animations that delay the demo.

Primary viewport: 1440 × 900. Clean behaviour at 1280 × 720; tablet functional, mobile readable but secondary. Premium, executive, calm, analytical, high-contrast and decision-first. Avoid generic AI graphics, robots, brain icons, neon overload, cheap gradients, excessive glassmorphism, tiny labels and unnecessary animation.

35. Self-guided prospect experience

Within 3-5 minutes, the supplied route sequence must explain: downstream sizing complexity; M demand uplift; Cherry L fit distortion; size-level inventory actions; matching-set constraints; next-buy allocation; scenario impact; specialist judgment; the recurring managed service; and customisation around NATURANA's wider business. Use the existing page headings, insight cards, CTAs and disclaimers. No additional modules are required.

36. Five-minute live demo script

0:00-0:40 - Weekly Brief

“Stephanie, you described the difficulty of translating two sizing systems. I started one step after that problem: once customers actually begin buying through those two structures, how do you know what that demand should change in the next buy?”

Open priority cards.

0:40-1:20 - Size Translation

“The starting point is a planning translation, not a claim that one size perfectly equals another. We use the historical structure to create an initial curve, then let actual commercial behaviour update it.”

1:20-1:55 - Size Demand

Point to:

M 24% → 33%.

“The first meaningful signal here is that M is carrying more retained demand than the translated curve expected.”

1:55-2:40 - Fit Signal

Open Cherry L.

“This is why sales alone can be dangerous. L looks like the winner if we only look at gross sell-through. But once the exchanges are followed, a large part of that demand is moving into M.”

Show INVESTIGATE.

2:40-3:15 - SKU Planning

“The planning layer then converts those signals into actual size-level actions across all 85 variants.”

Show all actions.

3:15-3:45 - Set Risk

Open Cherry M / Candy M.

“And we’re not planning each SKU in isolation. If the brief runs short first, the set becomes constrained even if the bra is healthy.”

3:45-4:15 - Next Buy

“Now we can answer the commercial question: where should the next inventory euro actually go?”

Show €50K.

4:15-4:40 - Scenario

Change demand +15%.

“Before committing it, we can test what happens if the launch keeps accelerating or supplier timing moves.”

4:40-5:00 - Managed Intelligence

“And this is the important part. This isn’t a sizing application NATURANA would need to manage. It’s an example of a managed planning layer built around one real decision problem. A live workspace would be shaped around your actual assortment, systems and planning rules, while ScaleSight keeps the analysis current and brings forward the decisions that deserve attention.”

Finish.

37. Commercial endpoint

At the bottom of /managed-intelligence or /assumptions:

Eyebrow:

FROM CONCEPT TO LIVE PLANNING

H2:

Build the planning layer around NATURANA's actual business.

Copy:

This example uses public product structure and illustrative operating assumptions. A live ScaleSight engagement would connect the same planning logic to NATURANA's actual sales, inventory, returns, purchase orders, supplier timing and commercial context - then our team would maintain the analysis and work with your team on the recurring decisions that matter.

CTA:

Discuss a NATURANA Planning Pilot

Secondary:

See what could be customised

Avoid aggressive sales styling.

38. QA matrix

All checks are derived from the supplied specification. Source review items below must remain explicit; do not resolve them by changing canonical values.

Area	Check / acceptance evidence
Product data	Exactly 8 products and 85 unique variants. Exact SKU/barcode join; no 90E for Plum. Colours, sizes and four matching sets match Phase 1.
Synthetic data	All 85 operating rows preserve every supplied value. No negative inputs; retained demand uses sales - returns - exchange out + exchange in.
Executive baseline	6 BUY DEEPER + 11 REPLENISH + 1 INVESTIGATE = 18. Also 9 WATCH, 9 REDUCE NEXT BUY and 49 HOLD.
Calculations	WOC = OH / forecast per week; preserve displayed source precision. Cherry L retained = 25; M = 31; Candy Pink M = 37. Indices 86 / 119 / 128.
Allocation	Eight product allocations total €47,500; reserve €2,500; overall €50,000. Planning quantities preserve source costs.
Size curves	Each canonical mix totals 100%. M 24% to 33%; L 25% to 22%. Do not regenerate canonical percentages from another population.
Scenarios	Base 18 actions / 2 risks; Upside 24 / 3 / €57,500 requirement / €7,500 gap; Delay 26 / 4 / €8,500 incremental; Fit -12% L / +6% M.
UX	All 10 routes load. Filters, urgency sorting, first 20 rows, pagination and drawer work. Scenario reset restores base state atomically; shared scenario controls stay consistent.
Visual QA	No clipped charts or tables, tiny labels, delayed animation or colour-only statuses. Check primary, smaller desktop, tablet and mobile views.
Managed service	Specialist review and Cherry L override visible. ScaleSight maintains analysis; NATURANA owns decisions.
Public safety	Full disclaimer and illustrative badge visible. No implication of access to private NATURANA data; no synthetic translation presented as official guidance.

SOURCE REVIEW REQUIRED - The supplied common alpha gross/fit-adjusted percentage curves do not equal a direct aggregation of the four alpha-product operating tables. Preserve both sources; the population or weighting that links them is not supplied.

SOURCE REVIEW REQUIRED - Incoming quantities are supplied but receipt dates are not. Time-phased projections and confirmedIncomingBeforeRequirementDate cannot be fully reproduced without those dates.

SOURCE REVIEW REQUIRED - Aggregate exchange-outs and exchange-ins do not reconcile as a closed 85-variant exchange ledger. Only the Cherry L-to-M movement is explicitly described. Preserve row values; do not invent a full exchange destination ledger.

SOURCE REVIEW REQUIRED - Scenario preset outputs are fixed, but a complete calculation mapping for arbitrary slider combinations, Downside, promotion extension and all output fields is not supplied. Preserve preset outputs; do not invent coefficients.

SOURCE REVIEW REQUIRED - Set-risk threshold and attachRateAdjustment semantics are not fully specified. The supplied simplified two set-risk examples and general formula must both be retained.

SOURCE REVIEW REQUIRED - The Cherry L override example includes overrideType, but the canonical Variant interface does not declare it. Preserve the interface and example without silently altering either.

DEVELOPER WARNING - Per-variant expected demand, confidence, analyst reasons and model recommendations are not fully populated for all 85 rows. Keep canonical final actions; missing evidence must not be fabricated.

39. Acceptance criteria

Stephanie must be able to identify the mixed-sizing planning problem, the post-launch change, the stronger M signal, why Cherry L gross sales should not drive automatic deepening, the variants needing action, both matching-set risks, the €50K allocation, scenario decision changes, the analyst override, recurring ScaleSight responsibilities, NATURANA decision ownership and the scope for wider customisation.

The four source product tests in Section 40 govern acceptance. Missing source mechanics remain review items; they are not permission to invent new values.

40. Definition of done

Before Wahib calls this done, ask four questions.

Does it look like a generic dashboard?

If yes, redesign.

Does it look like a rigid sizing application?

If yes, redesign.

Can Stephanie understand the inventory problem within two minutes?

If no, simplify.

Can she see why ScaleSight remains involved after the workspace is built?

If no, strengthen Managed Intelligence.

The intended conclusion is:

This is one example of a planning capability that can be moulded around NATURANA's business, with a ScaleSight specialist continuously maintaining the analysis and turning changing data into decisions.

Appendix A. Complete public eight-product catalog

ID	Understatement public name	NATURANA public name	Colour	Size system	Understatement price	NATURANA price	Variants
DL-BRA	Micro Mesh Padded Bra	Wireless Triangle Bra - Dark Leo	Dark Leopard / Dark Leo	Band + cup	€65	€64.95	24
DL-BTM	Micro Mesh Midi Hipster	Briefs - Dark Leo	Dark Leopard / Dark Leo	EU numeric	€35	€34.95	7
PL-BRA	Micro Mesh Underwired Bra	Underwired Plunge Bra - Plum	Plum	Band + cup	€65	€59.90	19
PL-BTM	Micro Mesh Midi Hipster	Briefs - Plum	Plum	EU numeric	€35	€34.95	7
CP-BRA	Opaque Triangle Scoop Bralette	Wireless Triangle Bra - Candy Pink	Candy Pink	Alpha	€69	€69	7
CP-BTM	Opaque Mesh Midi Briefs	Midi-Briefs - Candy Pink	Candy Pink	Alpha	€35	€35	7
CH-BRA	Opaque Mesh Balconette	Wire-free Balconette Bra - Cherry	Cherry	Alpha	€79	€79	7
CH-BTM	Opaque Mesh Midi Briefs	Midi-Briefs - Cherry	Cherry	Alpha	€35	€35	7

Total public variants: 85.

A useful cleanup for the demo: the Dark Leo Naturana page has one inconsistent bullet calling it “underwired,” while its own description says it is without underwires, and Understatement calls it a padded wireless bra. I would therefore treat **“padded wireless triangle bra”** as the correct demo description rather than repeating that apparent copy inconsistency.

Appendix B. Complete public SKU and barcode matrix

[PUBLIC FACT] Understatement public identifiers are canonical. NATURANA SKU is recorded only for directly supplied examples; otherwise not publicly recorded in canonical source.

Product	Size	Public SKU	Barcode	NATURANA public SKU

Appendix D. Synthetic size-translation matrices

Never call this an official fit chart.

UI label:

Synthetic planning translation

Bra cohorts

Historical fit cohort	Initial alpha allocation
70A-70B	60% XS / 40% S
70C-70D	55% S / 45% M
75A-75B	60% S / 40% M
75C-75D	55% M / 45% L
80A-80B	50% M / 50% L
80C-80D	60% L / 40% XL
85A-85B	35% L / 65% XL
85C-85D	60% XL / 40% XXL
90A-90B	40% XL / 60% XXL
90C-90D	65% XXL / 35% 3XL
95A-95B	45% XXL / 55% 3XL
95C-95D	30% XXL / 70% 3XL

These are **synthetic planning weights**, not customer fit recommendations.

Bottom translation

EU size	Synthetic alpha translation
36	70% XS / 30% S
38	70% S / 30% M
40	70% M / 30% L
42	70% L / 30% XL
44	70% XL / 30% XXL
46	70% XXL / 30% 3XL
48	100% 3XL

Appendix E. Canonical size-curve values

Use this everywhere.

Initial translated planning curve

Size	Initial mix
XS	9%
S	18%
M	24%
L	25%
XL	13%
XXL	7%
3XL	4%
Total	100%

Illustrative gross launch mix

Size	Gross launch mix
XS	7%
S	17%
M	31%
L	26%
XL	10%
XXL	6%
3XL	3%

Fit-adjusted commercial mix

Size	Fit-adjusted mix
XS	7.5%
S	17.5%
M	33.0%
L	22.0%
XL	10.5%
XXL	6.0%
3XL	3.5%
Total	100%

The insight:

M has gained **9 percentage points** versus the initial planning curve.

L gross demand looks approximately aligned with expectation, but after exchanges/returns:

L falls **3 percentage points below** the initial planning curve.

Appendix F. Forecast-learning assumptions

This page needs more than one example.

Historical cohort	Initial	Early illustrative behaviour	Planning change
75C-75D	55% M / 45% L	66% M / 34% L	Increase M weighting
80A-80B	50% M / 50% L	58% M / 42% L	Moderate M uplift
80C-80D	60% L / 40% XL	51% L / 49% XL	Raise XL assumption
85A-85B	35% L / 65% XL	37% L / 63% XL	No material change
85C-85D	60% XL / 40% XXL	57% XL / 43% XXL	No material change
90C-90D	65% XXL / 35% 3XL	62% XXL / 38% 3XL	Keep under review

Analyst statement:

Early behaviour suggests that some demand originally expected to sit in L is being retained in M. The change is meaningful enough to alter the next-buy assumption, but the launch window remains short, so confidence remains Moderate rather than High.

Appendix G. Open-to-buy allocation

Canonical scenario:

Available OTB: €50,000

Recommended committed:

€47,500

Reserve:

€2,500

Product	Recommended allocation
Candy Pink bralette	€11,500
Candy Pink briefs	€5,000
Cherry balconette	€9,500
Cherry briefs	€4,500
Plum underwired bra	€7,500
Plum hipster	€3,000
Dark Leo padded bra	€5,000
Dark Leo hipster	€1,500
Uncommitted reserve	€2,500
Total	€50,000

Using synthetic unit costs, those correspond conceptually to:

Product	Cost	Planning quantity
Candy Pink bralette	€23	500
Candy Pink briefs	€10	500
Cherry balconette	€25	380
Cherry briefs	€10	450
Plum bra	€25	300
Plum hipster	€10	300
Dark Leo bra	€25	200
Dark Leo hipster	€10	150

The allocation is a **planning budget**, not a literal PO recommendation.

The UI must say:

Recommended planning allocation under current assumptions.

Never:

Optimal allocation.

Appendix H. Scenario presets and outputs

Route:

/scenario

H1:

Scenario Planning

Subheading:

Change the assumptions before committing inventory and see which decisions remain robust.

Controls:

Overall demand uplift

-20% → +40%

M demand adjustment

-20% → +30%

L demand adjustment

-20% → +30%

Return-rate adjustment

-5 to +10 percentage points

Size-exchange adjustment

-5 to +10 percentage points

Lead-time change

-2 → +4 weeks

Open-to-buy

€25K → €100K

Matching-set attach rate

40% → 80%

Promotion extension

Off / On

Buttons:

Reset to Base Plan

Base / Upside / Downside

Outputs:

Projected 8-week demand

Variants requiring action

Set risks

Required inventory investment

Recommended allocation

Reserve

Size-curve impact

Key decision changes

Base

Material actions:

18

Set risks:

2

Recommended commitment:

€47,500

Reserve:

€2,500

Upside preset

Demand:

+15%

M demand:

+10% additional

Lead time:

unchanged

Outputs:

Material actions:

24

Set risks:

3

Recommended requirement:

€57,500

Available OTB:

€50,000

Planning gap:

€7,500

Recommendation:

Do not spread the available OTB evenly. Protect M across Candy Pink and Cherry, preserve Plum 75C/80C/85C, and accept lower coverage in slower tail sizes.

Supplier Delay preset

Lead time:

+2 weeks

Outputs:

Material actions:

26

Set risks:

4

Incremental required commitment:

€8,500

Recommendation:

The lead-time delay has more operational impact than the same percentage increase in demand because low-cover M variants lose the opportunity to recover before the next receipt.

Fit Friction preset

L exchange rate:

+5 percentage points

Outputs:

L fit-adjusted demand:

-12%

M retained demand:

+6%

Recommendation:

Reduce incremental L commitment and preserve capacity for M until the fit signal stabilises.

Every output panel must say:

Illustrative assumption-based scenario

Appendix I. Recommendation rules

Use explicit rules.

BUY DEEPER

Trigger when:

```
fitAdjustedDemand > 115% of planning expectation
AND
weeksOfCover < 4
AND
signalConfidence != LOW
```

REPLENISH

```
weeksOfCover < target threshold
AND
demand >= planning expectation
AND
confirmed incoming does not fully resolve projected gap
```

INVESTIGATE

```
grossDemand is strong
AND
exchangeOutRate >= 15%
AND
retainedDemand materially disagrees with grossDemand
```

WATCH

```
signal may matter
BUT
confidence is LOW/MODERATE
OR
variance is insufficient for immediate commitment
```

REDUCE NEXT BUY

weeksOfCover >= 10
AND
forward demand <= initial plan
AND
no confirmed business context justifies maintaining depth

HOLD

Everything remains within acceptable planning range.

Appendix J. Calculation formulas

Weeks of cover

$$\text{weeksOfCover} = \frac{\text{onHand}}{\text{forwardWeeklyDemand}}$$

Lead-time demand

$$\text{leadTimeDemand} = \text{forwardWeeklyDemand} * \text{leadTimeWeeks}$$

Safety stock

$$\text{safetyStock} = \text{forwardWeeklyDemand} * \text{safetyStockWeeks}$$

Required inventory

$$\text{requiredInventory} = \text{leadTimeDemand} + \text{safetyStock}$$

Reorder gap

$$\text{reorderGap} = \max(\begin{aligned} &0, \\ &\text{requiredInventory} \\ &- \text{currentAvailableInventory} \\ &- \text{confirmedIncomingBeforeRequirementDate} \end{aligned})$$

Projected inventory

$$\begin{aligned} \text{projectedInventory}[t] = & \text{openingInventory} \\ & + \text{cumulativeIncoming}[t] \\ & - \text{cumulativeForecastDemand}[t] \end{aligned}$$

Net retained demand

grossSales
- returns
- exchangeOut
+ exchangeIn

Commercial demand index

retainedDemand /
initialExpectedRetainedDemand
* 100

Set constraint

setRisk =
matchingTopCoverage < threshold
OR
matchingBottomCoverage < threshold

Planning confidence

LOW

fewer observations, high mapping uncertainty or strong stockout distortion.

MODERATE

enough data to adjust the plan but launch history remains limited.

HIGH

stable pattern across multiple planning cycles and limited fit distortion.

In this demo the overall alpha-size curve remains:

MODERATE

```

interface ScenarioState {
  mode: "BASE" | "UPSIDE" | "DOWNSIDE";

  overallDemandUpliftPct: number;
  mDemandAdjustmentPct: number;
  lDemandAdjustmentPct: number;
}

```

```
returnRateAdjustmentPP: number;
exchangeRateAdjustmentPP: number;

leadTimeAdjustmentWeeks: number;

openToBuyBudgetEUR: number;

setAttachRatePct: number;

promotionExtensionEnabled: boolean;

fitAdjustedDemandEnabled: boolean;
exchangeAdjustmentEnabled: boolean;
}
```

Base:

```
overallDemandUpliftPct = 0
mDemandAdjustmentPct = 0
lDemandAdjustmentPct = 0
returnRateAdjustmentPP = 0
exchangeRateAdjustmentPP = 0
leadTimeAdjustmentWeeks = 0
openToBuyBudgetEUR = 50000
setAttachRatePct = 62
promotionExtensionEnabled = false
fitAdjustedDemandEnabled = true
exchangeAdjustmentEnabled = true
```

Appendix L. Exact UI copy library

The complete verbatim page copy is typeset in Sections 17-26. Global header and navigation copy is in Section 16; commercial endpoint copy is in Section 37. These sections are the authoritative copy library; no paraphrasing is required.

Across the application, include small contextual cues.

Examples:

Reviewed by ScaleSight

Updated in this planning cycle

ScaleSight recommendation

Planning assumption

Needs management decision

Monitoring next cycle

Do not sprinkle them everywhere.

They should appear where interpretation happens.

This is the key distinction:

system output

versus

ScaleSight-reviewed decision

Appendix M. QA checklist

Use this checklist with Section 38 source review notes. All supplied values remain authoritative.

Area	Check / acceptance evidence
Product data	Exactly 8 products and 85 unique variants. Exact SKU/barcode join; no 90E for Plum. Colours, sizes and four matching sets match Phase 1.
Synthetic data	All 85 operating rows preserve every supplied value. No negative inputs; retained demand uses sales - returns - exchange out + exchange in.
Executive baseline	6 BUY DEEPER + 11 REPLENISH + 1 INVESTIGATE = 18. Also 9 WATCH, 9 REDUCE NEXT BUY and 49 HOLD.
Calculations	WOC = OH / forecast per week; preserve displayed source precision. Cherry L retained = 25; M = 31; Candy Pink M = 37. Indices 86 / 119 / 128.
Allocation	Eight product allocations total €47,500; reserve €2,500; overall €50,000. Planning quantities preserve source costs.
Size curves	Each canonical mix totals 100%. M 24% to 33%; L 25% to 22%. Do not regenerate canonical percentages from another population.
Scenarios	Base 18 actions / 2 risks; Upside 24 / 3 / €57,500 requirement / €7,500 gap; Delay 26 / 4 / €8,500 incremental; Fit -12% L / +6% M.
UX	All 10 routes load. Filters, urgency sorting, first 20 rows, pagination and drawer work. Scenario reset restores base state atomically; shared scenario controls stay consistent.
Visual QA	No clipped charts or tables, tiny labels, delayed animation or colour-only statuses. Check primary, smaller desktop, tablet and mobile views.
Managed service	Specialist review and Cherry L override visible. ScaleSight maintains analysis; NATURANA owns decisions.
Public safety	Full disclaimer and illustrative badge visible. No implication of access to private NATURANA data; no synthetic translation presented as official guidance.
